Furniture ready for
outdoor applications

Paged

Every member of the HoReCa industry will appreciate this – the sun, wind, rain and air humidity are not a problem anymore! From now on, consumers can enjoy their meetings and parties outside even in adverse weather conditions. Our newest innovative technology – the WRB (Weather-Resistant Beech) – keeps your furniture protected for years during outdoor activities in the temperature range between 5° – 60° C (40° – 140° F).

**tests in the chamber for cyclic
corrosion tests**, made according
to ISO 9227: 2012

Paged

Maintenance of furniture made using WRB technology is easy. The furniture does not require sanding before application of the preservative. To maintain a 3 years warranty, maintenance of furniture made using WRB technology should be carried out at least once every 9 months, in accordance with the attached instructions.
